

CONTROL & MANAGE YOUR LOGISTICS OPERATION

Extended Supply Chain

CarrierNet Control Tower

Benefits

Latest Technology

Developed for Internet use
 Scalable
 Rules based
 Always up to-date
 Continuous improvement
 Functionality grows to meet changing needs
 Accessible from any browser device

Financial Benefits

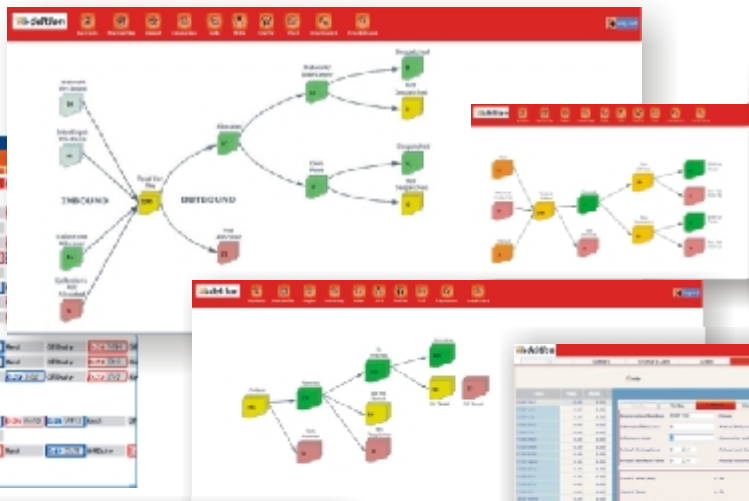

No capital expenditure required
 Pay for usage not infrastructure
 Only pay for what you need
 No maintenance charges
 Free upgrades
 Rapid deployment

CarrierNet Logistics Control Tower

The need for smarter logistics solutions, which provide all supply chain partners with the real-time information required to meet today's business demands, has been apparent for many years. However, this need has not been achieved, mainly because of technology constraints..

Deltion are proud to now be able to meet these demands with the CarrierNet Logistics Control Tower Service. Taking advantage of the latest Internet technology, CarrierNet provides a range of such information in the form of dashboards or alerts and we have gathered a few examples. These dashboards and the information they display can be customised by manager, supply chain partner, or event type.
